Specialty Care CME Dinner & Presentation on:

State of the Art Multi-Disciplinary Breast Cancer Care

Breast cancer care is an ever evolving and complex subject. This presentation will focus on several aspects of breast cancer diagnosis and management including contemporary screening guidelines, appropriate work-up and staging, multi-disciplinary consultation with Surgeons and Oncologists, sequence of treatment and survivorship. The purpose of this presentation is to empower all providers with a clear sense of the process that all breast cancer patients go through and the state-of-the-art standards in risk adaptive management.

Learning Objectives:
1. Review the appropriate screening criteria for breast cancer based on national guidelines
2. Describe the appropriate work-up for a breast cancer including the use of various imaging modalities
3. List & compare the various surgical options from breast conservation à bilateral mastectomies
4. Examine the latest in risk-adaptive chemotherapy/endocrine therapy using clinical factors and the latest genetic tests
5. Identify the latest approaches in radiation therapy including intraoperative radiation, accelerated partial breast radiation, and accelerated external beam radiation treatments.
6. Recommend & discuss an inter-disciplinary team approach for breast cancer in primary care

Tuesday, September 15, 2015
6:00 – 8:00 pm

Community Health Center Network
101 Callan Ave, San Leandro, 94577 (1st Floor)
